EDUCATION

Hanlim Arts High School
Practical Music / 2015

Sohae College
Associate Degree, Practical Music / 2019

LORDLAND UNIVERSITY
Bachelor of Christian Management
Los Angeles, CA, USA | Graduated 2024

CORE COMPETENCIES

Trend research and design boards
WGSN, runway and store research
Seasonal boards aligned with the brand

Product development
Outerwear, bottoms and fit refinement
Tech packs and construction reviews

AI visualization
AI 3D imagery and product mockups
Design revisions and output review

Collaboration and projects
Jersey design for artist collaborations
Co-planning a tennis capsule
Labels, graphics and accessories

Graphics and digital tools
Illustrator, Photoshop, Figma
AI coding tools
Web portfolio planning and design

Office
Excel, PowerPoint, Word (MOS)
Notion

PROFESSIONAL EXPERIENCE

LF VANESSA BRUNO athé | Womenswear Designer

Seoul, KR | May 2021 - Present

Womenswear designer with over five years of experience in outerwear, bottoms and jersey, drawing on French-inspired materials and silhouettes. Responsible for design proposals, technical drawings, tech packs, fittings, sample refinement and communication with overseas suppliers.

• Developed tailored jackets, fur, down, leather and tweed outerwear. Translated WGSN, runway and store research into seasonal design boards and styling proposals.

• Sole jersey designer for the SS22 Jang Woo-chul collaboration; co-planned a tennis capsule. Developed bear keyrings, labels, embroidery, graphics and packaging for the SS25 YK Jeong collaboration.

SELECTED WORK & RESULTS
Reinterpreting materials and form
Proposed a high-neck handmade blouson inspired by a half-zip knit styled with denim. Developed its silhouette and details using fabric from the materials team. My proposed denim styling was adopted in the seasonal lookbook.

Balancing design details and target retail price
Replaced pintucks with gathers where a print obscured the detail. Explained why the chemical-lace embroidery defining a blouse should remain and agreed an adjusted cost-to-retail ratio with the merchandising team.

Fit analysis and follow-up improvements
Fitted a colleague’s trousers to investigate store feedback on length, identifying the relationship between wearing position and rise. After team review, my proposed adjustment was reflected in reorders and subsequent styles.

Mercerized jersey top sales
Sold 600 units across black and white in seven weeks in SS24. A sleeved version developed in response to store feedback sold 1,000 units in SS26.

AI IN PRACTICE
Generated AI variations from my own Illustrator drawings and revision instructions, then checked whether the requested design details were represented correctly.
• Knit vest: visualized knit structure and pocket interiors; refined English production instructions.
• Bear keyring: compared sample leg proportions using AI-generated 3D mockups before requesting a revised sample.
• Graphics and embroidery: compared surface treatments using my own artwork.

Design approach
I design clothes that catch the eye and keep people coming back after wearing them. I turn new design ideas into products by balancing materials, silhouette and comfort. Alongside Illustrator and Photoshop, I use AI visualization to compare revisions and communicate design details clearly throughout development.

RELATED EXPERIENCE
Seoul, KR | Apr 2018 - Apr 2021
Showroom presentations, overseas order events and design-room fitting work for Handsome, LF, Samsung C&T and other fashion companies.
