EDUCATION

Hanlim Arts High School
Practical Music

Seoul, South Korea | Graduated 2015

Sohae College
Associate Degree in Practical Music

Gunsan, South Korea | Graduated 2019

LORDLAND UNIVERSITY
Bachelor of Christian Management

Los Angeles, CA, USA | Graduated 2024

CORE COMPETENCIES

Trend Research & Design Boards
Compare specialist forecasts and WGSN with collections, linking brand-relevant design elements with everyday references to build design boards.

Product Development & Quality
Assess materials, silhouettes, trims and construction across outerwear and bottoms. Develop new styles into core products.

AI & Design Visualization
Apply self-taught AI skills to visualize revisions and refine technical drawings. Use specialist trend resources with AI to create image boards and design options.

Collaboration & Projects
Translate varied concepts into brand products through artist collaborations and athleisure capsule collections.

Graphic Tools
Adobe Photoshop
Adobe Illustrator · Figma

Office
MOS · Excel · PowerPoint · Word

PROFESSIONAL EXPERIENCE

LF VANESSA BRUNO athé | Womenswear Designer

Seoul, South Korea | May 2021–Present

Woven womenswear designer in my sixth year, developing outerwear, bottoms, capsules and collaborative products that connect brand identity with seasonal trends.

- Visualize revisions with AI and refine details based on Illustrator originals to communicate design intent clearly for overseas production.
- Compare trend forecasts and WGSN with runway collections, then use AI to expand everyday detail and styling references into design boards.
- Develop best-selling bottoms with reliable fits and distinctive silhouettes that meet customer needs, and establish new styles as core products.
- Design outerwear across fur, down, double-faced wool, leather, tweed and casual styles. Contribute to sales and improved cost ratios through high-volume overseas production.
- Independently managed the SS22 jersey project with artist Woochul Jang; co-planned a tennis capsule using athleisure materials; and planned apparel and accessories (key charms, hangtags and labels) for the SS25 collaboration with director Jung Yoon-ki, extending the brand's identity.

ADDITIONAL INDUSTRY EXPERIENCE

Seoul, South Korea | Apr 2018–Apr 2021

Fashion Showroom & Fitting Experience | 2018–2021

Experience in collection reviews, overseas sales presentations and design studio fittings at HANDSOME, LF, Samsung C&T and other fashion companies.

MOTIVATION & CAREER GOALS

My strength is developing new styles into lasting core products while preserving a brand's identity. At VANESSA BRUNO athé, I have developed a range of outerwear and separates, creating best-performing styles through reliable fits and distinctive silhouettes. This work has sharpened my eye for how texture, fit and small details shape a product's quality. I want to bring that experience to MUSINSA STANDARD WOMAN, enhancing the quality customers can feel within its accessible price range. I am applying to help create signature products that add considered details to everyday essentials and keep customers coming back.

Another strength is my initiative in learning and applying new tools instead of settling into familiar ways of working. Before my company began offering AI training, I invested my own time and money in studying AI tools and using them in design. In a studio that uses hand-drawn flats for initial approvals, I found ways to apply AI at later stages: research for design boards, visualizing revisions and refining details in technical drawings for overseas production. Through hands-on use, I have learned which tasks benefit from AI and where a designer's judgment is essential. While exploring alternatives with AI, I draw on my experience to assess brand relevance, the feasibility of materials and silhouettes, and the accuracy of production details. I put new technology to practical use, beyond simply learning how it works.

I have translated varied concepts into brand products, from seasonal designs aligned with the Paris head office's products to co-planning a tennis capsule, independently managing an artist collaboration, and planning accessories with a director. Developing specialty outerwear and overseas-produced styles has taught me to consider production methods and costs alongside materials and silhouettes. Turning new ideas into lasting products while retaining the brand's character is an essential design capability—and one of my strengths.

At MUSINSA STANDARD WOMAN, I will draw on my experience in bottoms to propose fits and silhouettes that give customers clear reasons to choose them again. I will use AI to compare alternatives quickly and share revision directions clearly, while carefully assessing fit, fabric, construction and details in physical samples. By refining products in response to sales and connecting them with outerwear styling, I hope to create eye-catching looks customers return to. Combining my experience in contemporary womenswear with my initiative in adopting new tools, I will help the brand's new styles become part of customers' everyday lives.
